

Carbon Reduction Strategy 2024 / 2025

According to the European Union, climate and weather monitoring service, Global warming surpassed 1.5 degrees Celsius over the past 12 months for the first time on record. If this continues, it will push the limits of life on Earth to adapt

CO₂

As a business, we need to do our part to ensure everything we do minimises our impact on climate change

We are committed to the conservation and improvement of the environment and recognise our impact and responsibility to manage and minimise the impacts of our activities, products, and services.

As part of our ongoing commitment to reducing our environmental impact, we have developed the Carbon Reduction Framework (CRF).

The framework is designed to ensure we meet the needs of the present without compromising the ability of future generations to meet their own needs.

This will be achieved through the implementation of a robust environmental system (EMS) and ensuring our processes show continuous improvement. Part of this EMS system will also ensure we have the following.

Reaching our carbon reduction goals

We will achieve a 5% Annual Carbon Reduction by measuring our current output as a baseline

All new fleet cars will be plug-In Hybrid as a minimum

We will encourage research into alternative fuels such as HVO

All new HGV vehicles, plant & ancillary machinery will be Euro 6 standard

Reaching our carbon reduction goals

We will achieve a 5% Annual Carbon Reduction by measuring our current output as a baseline

We will eliminate single use plastics in our PPE and consumables

Encourage our supply-chain to act responsibly towards the environment

Maintain & promote Environmental accreditations such as ISO 14001 & PAS2080

Reaching our carbon reduction goals

We will achieve a 5% Annual Carbon Reduction by measuring our current output as a baseline

All our offices will be fitted with PIR light sensors and hand dryers

Commit to NET ZERO by 2050

We will do our bit to off-set the carbon we do produce through unique initiatives
